Title of Assignment:	Jira Project & Issue Tracking
Theory:	Jira is a project management and issue-tracking tool widely used in Agile and DevOps environments. It helps teams create projects, manage backlogs, assign tasks, track bugs, monitor progress, and organize development activities efficiently through Scrum and Kanban workflows.
Implementation:	Step 1: Log in to Jira and create a new Scrum project. Open the project dashboard to view the project summary. 

Step 2: Click Create, select Story as the work item type, enter the required details, and create the story.

Step 3: Open the Backlog section and verify that the newly created story and tasks are successfully added to the project backlog.
